Narayanan A , Chandramohan M , Chen L , et al. subgraph2vec: Learning Distributed Representations of Rooted Sub-graphs from Large Graphs[J]. 2016.	Aim: Learning latent representations of rooted subgraphs from large graphs. Contributions: <ul style="list-style-type: none">Propose subgraph2vec.Develop a modified version of the skipgram language model.Discuss how subgraph2vec’s representation learning technique would help to build the deep learning variant of WL kernel.
